

Bulk Purchasing

Current Challenges

- Operators pay for products and services at a price which at times, are hard to afford as purchases are not made in bulk.
- Much time is wasted just to compare cost and quality of products and services.

Bulk Purchasing Portal!

- ASSETS ezMart (ezmart.sg, ready by end August) will allow centres to easily order and purchase products and services online. Through the combination of purchases with other centres, better discounts can be obtained and there is the sharing of suppliers who provided quality products and competitive prices too.

The current bulk purchasing initiatives with its related benefits can be seen in the table below.
